S&W M&P15 Series

The S&W M&P15 series AEG are officially licensed products. Full S&W M&P15 trademarks and markings are engraved and laser-engraved on the metal receiver and nylon fiber stock. Like all KA M4 AEG, there will be unique serial number on the receiver, which is equipped with our integrated bolt lock / release system. All the RAS for the S&W series is machined out of aluminum.

The S&W M&P15 MOE (Magpul Original Equipment) rifle is one of the cross-over project between King Arms and Magpul Industries. The rifle is equipped with Magpul PTS MOE Grip, Magpul PTS MOE Carbine Stock, Magpul PTS MOE Handguard, Magpul PTS MBUS (Magpul Back Up Sight) and a 360 rounds PMAG. A 1600mAh 9.6V mini type battery can be installed inside the handguard. AEG is available in Black and Dark Earth color. Optional rails can be installed on the handguard slots, which sold separately.

Also, we have another 3 S&W M&P rifle which are equipped with rail handguard. S&W M&P15X Carbine, S&W M&P15 PSX and S&W M&P15T Rifle. They come with PEQ-16 battery box and 2 panels will be included for the M&P15T Rifle.

Oberland Arms Series

Oberland Arms is one of the best firearms manufacturers in Europe. The OA-15 series are the most trusted and praised rifles in their products line. Now, King Arms has obtained the exclusive license from Oberland Arms Germany to manufacture the OA's AEG. Full OA trademarks are engraved on the receiver. The integrated bolt catch / release system makes the hop-up adjust easily accessible. The stock is capable to store up to a KA 1600mAh crane stock type battery or user can use Li-Ion battery and install it inside the stock pipe.

Oberland Arms

Oberland Arms is a firearms manufacturer based in Germany. They manufactures a wide variety of high quality paramilitary style rifles, including an OA-15 series based on the AR-15 design. Nowadays, They are one of the best firearms manufacturers in Europe. The rail handguard is on the most rigid handguard systems currently available. With the handguard being mounted directly to our new upper receiver, the handguard becomes one part with the upper, it's always perfectly aligned. This is the reason why the OA-15 has developed within a year to the leading semi-automatic machines in Germany.

There is a Tatzelwurm in their logo which is a legendary creature that is said to dwell in the Alps mountains areas covering part of Austria, Bavaria and Switzerland. It is reputedly has a snake-like body between 2 and 6 feet in length, with two clawed front legs, but no hind legs. Local folklore holds that the Tatzelwurm is able to defend itself by expelling poisonous fumes that are capable of killing a human.

SIG 556 Series

This official licensed rifle has full SIG trademarks. The handguard and stock of this SIG556 AEGs are made of Nylon Fiber and the handguard can be removed easily by just releasing one pin. The selector lever is ambidextrous designed for easy fire mode change, and the AEG's bolt carrier and blowback system helps to create more realistic feel to the rifle so players can enjoy better.

The SIG556 DMR is equipped with a front sight, a steel rear sight and a Magpul Precision Rifle Stock. The butt pad and cheek piece on the stock can be adjusted with the click wheel. The base cover can be removed to install monopod on its rail. Package comes with a 100 rounds magazine and front sight.

GALIL Series

All King Arms Galils are official licensed products. We build the Galil AEG as close as the real steel, the appearance and markings are flawless. The specs are identical to the real firearm so most of the accessories for the Galil are compatible with our AEG (e.g. handguard, stock and scope mount).

In order to create more realistic shooting experience, the special designed bolt carrier operating mechanism was installed to simulate the real firearm blowback action. One of the best features of this AEG is the Betaight Ready Trifium night sight set. And a dummy selector is installed on left side of AEG to stick with the original design. Even it is an AEG, it is still a very robust piece because it is build with Nylon Fiber handguard, 6065 Aluminum receiver, and steel top cover and parts.

FAL Series

King Arms FAL and L1A1 are both full metal AEG. Reinforced gear box were used and furnished with detailed imitation gas tube and gas block. For the L1A1, special designed bolt carrier operating mechanism has been installed on this AEG to simulate the real firearm blowback action. Steel parts like selector, slings and knobs were used to provide better look and texture. A 12V battery can sit in the buttstock nice and firm so shooting power and time can be maximized. Moreover, each AEG carry a unique in serial number so every piece is one of a kind.

The FAL AEGs with fixed stock can store a 3000mAh 8.4V large type battery. With a little modification, a 3000mAh 9.6V large type battery can be fitted. There are handguards in 3 different lengths available to choose. For the FAL AEGs equipped with folding stock, battery can be installed inside the handguard instead.

Grenade Launcher Series

Sgt. William F. Pickler, from A Company, 5th Battle Group 6th Infantry, was issued a RS M79 in Berlin, 1961.

This photo was taken in the Grunewald Forest during testing of the 40mm M79 in the Autumn of 1961.

At the age of 70, a War Veteran, now owner of the King Arms M79.

"I received the M79. It is a work of art, and brought back fond memories. Handling it took me back to some of the finest days of my life." William F. Pickler.

The M79 grenade launcher is a single-hit, shoulder-fired, break-action grenade launcher which fires a 40mm grenade cartridge. It is a full metal launcher with a real wood stock, which a rubber pad affixed to the shoulder stock to make it more supportive and comfortable when aiming. The trigger guard can be rotate either to the left or right by pushing the detent on the right of the trigger guard, which is a very useful feature when user is wearing gloves.

M79 Grenade Launcher

CODE	KA-CART-04
WEIGHT w/o MAGAZINE	2000 g
LENGTH	720 mm
MAIN MATERIAL	Aluminum; Real Wood
COLOR	Black; Wood
CALIBER	40 mm Cartridge
FIRE MODE	Single Shot

M79 Sawed-Off Grenade Launcher

CODE	KA-CART-04-S
WEIGHT w/o MAGAZINE	1070 g
LENGTH	340 mm
